No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

Contents of Volume 92

NUMBER 1, JANUARY 15, 1979

G. ADAM, EVAMARIE SANDER, AND ROBERT J. SHEPHERD. Structural Differences between Pea Enation Mosaic Virus Strains Affecting Transmissibility by *Acyrthosiphon pisum* (Harris) 1

LAWRENCE A. CALIGUIRI AND KATHRYN V. HOLMES. Host-Dependent Restriction of Influenza Virus Maturation 15

MICHAEL J. HAYMAN, BRIGITTE ROYER-POKORA, AND THOMAS GRAF. Defectiveness of Avian Erythroblastosis Virus: Synthesis of a 75K *gag*-Related Protein 31

VINCENT L. MORRIS, CHRISTINE KOZAK, J. CRAIG COHEN, PETER R. SHANK, PAUL JOLICOEUR, FRANK RUDDLE, AND HAROLD E. VARMUS. Endogenous Mouse Mammary Tumor Virus DNA Is Distributed among Multiple Mouse Chromosomes 46

MICHAEL FEISS, RICHARD A. FISHER, DEBORAH A. SIEGELE, BRIAN P. NICHOLS, AND JOHN E. DONELSON. Packaging of the Bacteriophage Lambda Chromosome: A Role for Base Sequences outside *cos* 56

LINDA KUDLER AND RICHARD W. HYMAN. Exonuclease III Digestion of Herpes Simplex Virus DNA 68

REX RISSER AND ROBERT POLLACK. Factors Affecting the Frequency of Transformation of Rat Embryo Cells by Simian Virus 40 82

KLAUS J. PORZIG, MARIANO BARBACID, AND STUART A. AARONSON. Biological Properties and Translational Products of Three Independent Isolates of Feline Sarcoma Virus 91

MARTHA M. HOWE, JAMES W. SCHUMM, AND AUSTIN L. TAYLOR. The *S* and *U* Genes of Bacteriophage Mu Are Located in the Invertible G Segment of Mu DNA 108

MARIE-LAURE BOUDIN, MAURICE MONCANY, JEAN-CLAUDE D'HALLUIN, AND PIERRE A. BOULANGER. Isolation and Characterization of Adenovirus Type 2 Vertex Capsomer (Penton Base) 125

TETSUYA YOSHIDA, YOSHIYUKI NAGI, KOICHIRO MAENO, MASAO IINUMA, MICHINARI HAMAGUCHI, TOSHISADA MATSUMOTO, SHOICHI NAGAYOSHI, AND MUNEMITSU HOSHINO. Studies on the Role of M Protein in Virus Assembly Using a ts Mutant of HVJ (Sendai Virus) 139

ROBERT F. RAMIG AND BERNARD N. FIELDS. Revertants of Temperature-Sensitive Mutants of Reovirus: Evidence for Frequent Extragenic Suppression 155

SUE A. MOYER AND SUSAN H. GATCHELL. Intracellular Events in the Replication of Defective Interfering Particles of Vesicular Stomatitis Virus 168

C. T. DUDA. Synthesis of Double-Stranded RNA. II. Partial Purification and Characterization of an RNA-Dependent RNA Polymerase in Healthy Tobacco Leaves 180

MICHAEL FEISS AND DEBORAH A. SIEGELE. Packaging of the Bacteriophage Lambda Chromosome: Dependence of *cos* Cleavage on Chromosome Length 190

EUGENIA WANG AND ALLAN R. GOLDBERG. Effects of the *src* Gene Product on Microfilament and Microtubule Organization in Avian and Mammalian Cells Infected with the Same Temperature-Sensitive Mutant of Rous Sarcoma Virus 201

HANS J. EGGERS, BERNADETTE BODE, AND DENNIS T. BROWN. Cytoplasmic Localization of the Uncoating of Picornaviruses 211

JOHN A. WAGNER AND ULRICH K. LAEMMLI. Maturation of the Head of Bacteriophage T4: 9-Aminoacridine Blocks a Late Step in DNA Packaging 219

SHORT COMMUNICATIONS

THEO A. A. DOPHEIDE AND COLIN W. WARD. A Hong Kong Influenza Hemagglutinin Light Chain: The Amino Acid Sequence of Cyanogen Bromide Fragments CN3 and CN4 and the N-Terminal 45 Residues 230

PRAVIN PATEL AND JOSÉ MENEZES. Differential Effect of Phosphonoacetic Acid on Early Antigen Synthesis in Two Epstein–Barr Virus Producer Cell Lines 236

PRAVINKUMAR B. SEHGAL AND IGOR TAMM. Two Mechanisms Contribute to the Superinduction of Poly(I)·Poly(C)-Induced Human Fibroblast Interferon Production 240

ARUP SEN, DOUGLAS O. HALVERSON, ULF R. RAPP, AND GEORGE J. TODARO. Sarcoma Virus-Specific Phosphoproteins Are Packaged in "Rescued" Type C Virions 245

GEORGE P. ALLEN AND CHARLES C. RANDALL. Proteins of Equine Herpesvirus Type 3. I. Polypeptides of the Purified Virion 252

AUTHOR INDEX FOR VOLUME 92, NUMBER 1 258

I. M. ČUMAKOV, G. Y. LIPSKAYA, AND V. I. AGOL. Comparative Studies on the Genomes of Some Picornaviruses: Denaturation Mapping of Replicative Form RNA and Electron Microscopy of Heteroduplex RNA 259
T. M. DMITRIEVA, M. V. SHCHEGLOVA, AND V. I. AGOL. Inhibition of Activity of Encephalomyocarditis Virus-Induced RNA Polymerase by Antibodies against Cellular Components 271
SYLVIA S. F. HU AND PETER K. VOGT. Avian Oncovirus MH2 is Defective in *Gag*, *Pol*, and *Env* 278
PETER K. VOGT, MICHAEL HAYMAN, ERIC HUNTER, AND PETER H. DUESBERG. A Nonconditional Replication-Defective Mutant of the Schmidt–Ruppin Strain of Rous Sarcoma Virus 285
THERESA N. H. LEE AND DANIEL NATHANS. Evolutionary Variants of Simian Virus 40: Replication and Encapsidation of Variant DNA 291
PETER J. M. ROTTIER, GEERTJE REZELMAN, AND ALBERT VAN KAMMEN. The Inhibition of Cowpea Mosaic Virus Replication by Actinomycin D 299
ORGAD LAUB, SUSAN BRATOSIN, MIA HOROWITZ, AND YOSEF ALONI. The Initiation of Transcription of SV40 DNA at Late Time after Infection 310
EDWARD A. HAVELL. Isolation of a Subspecies of Murine Interferon Antigenically Related to Human Leukocyte Interferon 324
W. BOSSART AND K. BIENZ. Virus Replication, Cytopathology, and Lysosomal Enzyme Response in Enucleated HEp-2 Cells Infected with Poliovirus 331
ROBERT C. A. YANG AND RAY WU. BK Virus DNA Sequence Coding for the Amino-Terminus of the T-Antigen 340
MONIQUE DUBOIS-DALCQ, OPENDRA NARAYAN, AND DIANE E. GRIFFIN. Cell Surface Changes Associated with Mutation of Visna Virus in Antibody-Treated Cell Cultures 353
G. P. ALLEN, J. J. MCGOWAN, C. C. RANDALL, W. MANCINI, Y.-C. CHENG, AND G. A. GENTRY. Purification and Characterization of Deoxythymidine Kinase (dTK) Induced in dTK$^-$ 3T3 Mouse Cells by Equine Herpesvirus Type 1 (EHV-1) 367
P. CASH, C. R. PRINGLE, AND C. M. PRESTON. The Polypeptides of Human Respiratory Syncytial Virus: Products of Cell-Free Protein Synthesis and Post-Translational Modifications 375
HENDRIK HUISMANS. Protein Synthesis in Bluetongue Virus-Infected Cells 385
HENDRIK HUISMANS AND HERCULES J. ELS. Characterization of the Tubules Associated with the Replication of Three Different Orbiviruses 397
J. W. ALMOND AND R. D. BARRY. Genetic Recombination between Two Strains of Fowl Plague Virus: Construction of Genetic Maps 407
J. W. ALMOND, D. MCGEOCH, AND R. D. BARRY. Temperature-Sensitive Mutants of Fowl Plague Virus: Isolation and Genetic Characterization 416
T. HATTA AND R. I. B. FRANCKI. The Fine Structure of Chloris Striate Mosaic Virus 428
C. H. SHAW, W. C. RUSSELL, AND D. M. K. REKOSH. Association of Adenovirus Early Proteins with a Nuclear Fraction That Synthesizes DNA *in Vitro* 436
BARRIE J. CARTER, CATHERINE A. LAUGHLIN, LUIS M. DE LA MAZA, AND MAUREEN MYERS. Adeno-Associated Virus Autointerference 449
RASHID SHAIKH, MAXINE LINIAL, SUSAN BROWN, ARUP SEN, AND ROBERT EISENMAN. Recombinant Avian Oncoviruses. II. Alterations in the *gag* Proteins and Evidence for Intragenic Recombination 463
KATHLEEN L. BERKNER AND WILLIAM R. FOLK. A Map of the Sites in the Polyoma Genome Cleaved by Endonuclease *Alu*I 482
BERCH E. HENRY, WILLIAM W. NEWCOMB, AND DENNIS J. O'CALLAGHAN. Biological and Biochemical Properties of Defective Interfering Particles of Equine Herpesvirus Type 1 495
WALTER WOLFGANG BODEMER AND MONIKA BODEMER. Partial Characterization of Herpes Simplex Virus Type 2 (HSV-2)-Specific Poly(A)+ RNA by Hybridization to *Eco* RI-Generated HSV-2 DNA Fragments 507
BRIAN J. KNOLL. Isolation and Characterization of Mutations in the *c*III Gene of Bacteriophage λ which Increase the Efficiency of Lysogenization of *Escherichia coli* K-12 518
SUSUMU MAEDA, KATSUYUKI HASHIMOTO, AND BUNSITI SIMIZU. Complementation between Temperature-Sensitive Mutants Isolated from *Aedes albopictus* Cells Persistently Infected with Western Equine Encephalitis Virus 532

I. SZIRÁKI AND E. BALÁZS. Cytokinin Activity in the RNA of Tobacco Mosaic Virus 578

ODILE AUJEAN, JOSIANE SANCEAU, ERNESTO FALCOFF, AND REBECA FALCOFF. Location of Enhanced Ribonuclease Activity and of a Phosphoprotein Kinase in Interferon-Treated Mengovirus-Infected Cells 583

UTHOR INDEX FOR VOLUME 92 587

UBJECT INDEX FOR VOLUME 92 589

NOTICE TO AUTHORS

Editorial Policy. *Virology* will publish articles on the biological, biochemical, genetic, and biophysical aspects of virus research. All manuscripts should meet the following four basic criteria. *First*, they should report *original* research results. Manuscripts are accepted for review on the understanding that the same or similar work, wholly or in part, has not been and will not be submitted for publication elsewhere. *Second*, they should report research that is *fundamental*, rather than applied. *Third*, they should report research that is *pioneering* in nature. Authors should clearly understand that space limitations may make it impossible to publish manuscripts that describe work that was performed competently but that does not break new conceptual ground; papers that describe results that have already been obtained with closely related virus or cell systems may be accepted only in exceptional circumstances. *Fourth*, they should be written as concisely as possible, their length being the minimum compatible with a clear presentation and interpretation of the experimental data. Repetition, such as between the Materials and Methods section and figure legends, should be carefully avoided. The Introduction should contain only material relevant to the research that is described; and the Discussion, which should exceed two pages only in exceptional circumstances, should be constructively interpretative and not merely restate the experimental results. Good writing requires careful examination that every word, phrase, and sentence is essential and arranged in logical sequence.

Manuscripts are accepted for review on the understanding that all persons listed as authors have given their approval for the submission of the paper; that any person cited as a source of personal communications has approved such citations; that locally and nationally prescribed safety regulations governing exposure of laboratory personnel and contamination of the environment have been observed; and that all variant virus and cell strains described or mentioned in the paper will be freely available for distribution upon request to all qualified members of the scientific community. Written verification of these conditions may be required at the Editors' discretion. Articles and any other material published in *Virology* represent the opinions of the author(s) and should not be construed as reflecting the opinions of the Editors and the Publisher.

Manuscripts should be submitted in duplicate to the editorial office of *Virology*, 111 Fifth Avenue, New York, N. Y. 10003, by first class mail in flat form.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be typewritten (not mimeographed), with wide margins on high quality bond paper, using double or triple spacing throughout. Subdivision of articles into *Abstract*, *Introduction*, *Materials and Methods*, *Results*, *Discussion*, *Acknowledgments*, and *References* is recommended. The manuscript must begin with an *Abstract*. In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiment described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given. Reviews of the literature should be restricted to closely pertinent papers. Tables, figures, names, quotations, and bibliography (and all text references to the same) should be carefully checked for errors. A proposed running head of no more than 37 characters should be included.

Figures and Tables. Number all figures consecutively with Arabic numbers and give each one a descriptive legend. All illustrations should be in finished form for the photoengraver. Figures should be planned to fit the proportion of the printed page (5½″ × 8″, column width: 2½″). Lettering on drawings should be made with a lettering set and should be large enough to take a reduction of 50–60 percent. Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper, if used, should be ruled in blue.

Photographs should be glossy prints with strong contrasts, and the magnification should be indicated by a scale. Photographs should be cropped to eliminate background material so that reproduction might be possible without reduction. Grouping of photographs should be indicated.

Tables should be typed on separate pages, numbered consecutively with Arabic numbers, and collected at the end of the manuscript. All tables must have descriptive headings and should be understandable without reference to the text.

References. Names of authors should be mentioned in the text with the year of publication in brackets. References should be listed alphabetically at the end of the paper as follows: Bawden, F. C., and Kassanis, B. (1954). Some effects of thiouracil on virus-infected plants. *J. Gen. Microbiol.* **10**, 160–173. **See, however, the instructions** for *Short Communications* **below.** The names of journals should be abbreviated according to the *Chemical Abstracts Service Source Index* (1969). References to books should include: author's name, year of publication, title of book (editor of book, if any), edition (if other than first), publisher, and place of publication.

Include in the reference list articles that are "in press," but incorporate in text or use footnotes for "manuscript in preparation," "unpublished observations," and "personal communication."
